Judging from the countless preparations and treatments which are continually being advertised for the purpose of making thin people fleshy, developing arms, neck and bust and replacing ugly hollows and angles by the sufficurved lines of health and beauty, there are evidently thousands of men and women who keenly feel their excessive thinness.

Thinness and weakness are usually due to starved nerves, Our bodies need more phosphate than is contained in modern foods. Physicians claim there is nothing that will supply this deficiency so well as the organic phosphate known among druggists as bitro-phosphate, which is inexpensive and is soid by Lee & Osgood and most all druggists under a guarantee of satisfaction or money back. By feeding the nerves directly and by supplying the body cells with the necessary phosphoria food elements, bitro-phosphate quickly produces a welcome transformation in the appearance; the increase in weight frequently being astonishing.

Clinical tests made in St. Catherine's hospital, N. Y. C., showed that two patients gained in weight 25 and 27 pounds, respectively, through the administration of this organic phosphate, both patients claim they have not felt to put on fiesh.
